

# SUPPLY VISION

## Job Description

Location: Chicago

Job Title: Software Engineer

Reports to: Amanda Bohl

Title: CEO

### GENERAL DESCRIPTION

Supply Vision is looking for a software engineer with an enthusiasm for design, analysis, architecture and development. As a member of the development team this role will be become proficient with our applications and database structure, effectively and clearly communicate with team members and provide clear and timely communication on projects. Candidates will participate in all aspects of the software development life cycle, using agile methodologies and will be instrumental in design and implementation decisions. The ability to grasp industry requirements and ask the right questions is essential. Candidates should bring a thirst for knowledge and discovery, bringing best practices and new industry trends to bear on all existing and new development ventures. Members of this team may be required to work hours other than the set shift hours to facilitate the completion of required work or resolve critical issues.

From a high level day to day overview, this position helps direct the offshore development team from a technical point, manages the release process, works with support on customer issues and helps scope projects and develop integrations with third parties.

Supply Vision is a growing team working in downtown Chicago. Interested candidates should want to work in a casual, startup environment, excited to be a part of the team and be instrumental in the product growth with each release.

### DUTIES AND RESPONSIBILITIES

- Design and creation of features for our hosted web applications to meet customer requests and business needs.
- Ongoing maintenance and improvements to the application, including bug fixes and performance enhancements
